PROFESSIONAL SUMMARY

Full stack developer with 6+ years of experience building web and mobile applications end-to-end, using Laravel and PHP on the back end and React Native, Expo, and React.js on the front. Experienced in owning the complete development lifecycle from architecture through deployment and post-release support, including AI-powered features built on the Claude API. Background spans internal enterprise systems and client-facing products for international clients.

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL

Back End: Laravel, REST API design, MySQL, API integration, application security

Front End: React Native, React.js, Expo, Vue.js

Tools and Practices: Git, Docker, Agile, code review, WebSockets, Webhooks, Reverb

AI Tools: Claude Code, Cursor

PROFESSIONAL EXPERIENCE

Mid-Level Full Stack Developer

Bell-Kenz Pharma, Inc. | Quezon City, Philippines | April 2024 - Present

- Develop full-stack mobile and web applications using Laravel, PHP, React Native, Expo, and MySQL to support internal business operations.
- Manage the end-to-end mobile application development lifecycle, from ideation and architecture design through deployment and post-release support.
- Built an AI-powered conversational reporting system on the Claude API, allowing users to submit reports through natural dialogue with automatic data capture and sensitive-data masking.
- Developed a gamified reporting application for physicians, applying game-like UI mechanics to improve engagement and reporting consistency.
- Built a real-time chat application for internal team communication and a CRM mobile application to streamline client relationship management.
- Developed a centralized data management system consolidating records across departments.
- Partner with QA, business analysts, and process owners to gather requirements and validate solutions throughout the SDLC.
- Work in an Agile environment, participating in sprint planning, daily stand-ups, and retrospectives to support iterative delivery.
- Use agentic AI tooling (Claude Code, Cursor) to accelerate delivery, paired with code review and testing discipline.

Software Developer

Xchanged Inc. | Philippines | February 2020 - April 2024

- Delivered production systems for Guam-based and Singapore-based clients across four domains: remittance processing, resort management, ordering, and patient medical records.
- Developed and maintained back-end and front-end applications using Laravel, PHP, React Native, and Vue.js.
- Designed and built REST APIs for front-end applications and integrated third-party APIs across web and mobile platforms.
- Hardened application security by implementing gate authorization, middleware policies, and Eloquent query parameterization.
- Converted a React Native mobile application to native iOS using SwiftUI.

- Applied scalability, security, and performance improvements to future-proof existing applications.
- Performed code reviews and contributed suggestions during team presentations and technology selection discussions.

Web Developer (Internship / OJT)

Philippine Commission on Women | National Capital Region, Philippines | April 2018 - May 2018

- Developed an internal ticketing system allowing agency employees to submit and track support requests through a web interface.

EDUCATION

Bachelor of Science in Computer Science

STI College | Graduated 2019
